1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

Avrupa Minerals Ltd. (the "Company") was incorporated on January 23, 2008 under the Business Corporations Act of British Columbia and its registered office is Suite 2610 – 1066 West Hastings Street, Vancouver, BC, Canada, V6E 3X1. The Company changed its name on July 7, 2010 and began trading under the symbol "AVU" on the TSX Venture Exchange (the "Exchange") on July 14, 2010. On September 20, 2012, the Company listed in Europe on the Frankfurt Stock Exchange under the trading symbol "8AM". The Company is primarily engaged in the acquisition and exploration of mineral properties in Europe.

These condensed consolidated interim financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. There are material uncertainties that cast significant doubt about the appropriateness of the going concern assumption.

If the Company is to advance or develop its mineral properties further, it will be necessary to obtain additional financing and while it has been successful in the past, there can be no assurance that it will be able to do so in the future. Failure to raise sufficient funds would result in the Company's inability to make future required property payments, which would result in the loss of those property options.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

2. BASIS OF PREPARATION

a) Statement of Compliance

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standards ("IAS") 34 "Interim Financial Reporting" ("IAS34") using accounting policies consistent with the IFRS issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

b) Basis of preparation

These condensed consolidated interim financial statements have been prepared on a historical cost basis except certain financial instruments which are measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The preparation of these condensed consolidated interim financial statements in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements.

These condensed consolidated interim financial statements, including comparatives, have been prepared on the basis of IFRS standards that are published at the time of preparation.

2. BASIS OF PREPARATION *(Continued)*

(c) New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the June 30, 2014 reporting period. The Company has not early adopted the following new and revised standards, amendments and interpretations that have been issued but are not yet effective:

- IFRS 9 (Amended 2010) Financial Instruments (mandatory adoption date has not yet been finalized)

The Company anticipates that the application of the above new and revised standards, amendments and interpretations will have no material impact on its results and financial position.

3. SIGNIFICANT ACCOUNTING POLICIES

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IFRS as issued by the IASB on a basis consistent with those followed in the Company's most recent annual financial statement for the year ended December 31, 2013.

These unaudited condensed consolidated interim financial statements do not include all note disclosures required by IFRS for annual financial statements, and therefore should be read in conjunction with the annual financial statements for the year ended December 31, 2013. In the opinion of management, all adjustments considered necessary for fair presentation of the Company's financial position, results of operations and cash flows have been included. Operating results for the six month period ended June 30, 2014 are not necessarily indicative of the results that may be expected for the year ending December 31, 2014.

Portugal

The Company, through its 100% holding in MAEPA, holds eight exploration licenses in Portugal, spread from the north to the south in the country. The licenses have been issued to MAEPA by the government of Portugal, and are as follows:

- Alvalade
- Covas
- Alvito
- Marateca
- Arcas
- Candedo

Licenses have varying work commitments, as approved by the government of Portugal, and all licenses carry a 3% Net Smelter Return (“NSR”), payable to the government of Portugal.

Alvalade:

On June 3, 2011, the Company signed a Memorandum of Understanding (“MOU”) with Antofagasta Minerals S.A. (“Antofagasta”) to undertake exploration on the Alvalade project. Antofagasta completed a US\$300,000 initial study of the project. Upon successful completion of the initial study, on December 22, 2011, the Company entered into the Alvalade Joint Venture agreement with Antofagasta whereby the Company granted to Antofagasta the option to acquire an undivided 51% interest in the project, which can be exercised by Antofagasta funding or incurring expenditures of an additional US\$4 million over three years (spent by February 2014). On February 25, 2014, the two parties signed an amended Joint Venture agreement which allows for more interim funding by Antofagasta, an expanded time frame in which to get a feasibility study decision, and a means for the Company to be carried to production, if there is a production decision to be made for the project. The amended agreement carries the following terms (in summary):

- After due diligence, exploration funding of US\$300,000 (completed).
- Antofagasta must spend US\$4 million on exploration to earn-in to 51% of the joint venture (“JV”) (Option 1 completed).
- To earn further 9% of the JV (for an aggregate total of 60%), Antofagasta must fund US\$2 million exploration by December 31, 2015 (Option 2 underway).
- To earn a further 5% of the JV (for an aggregate total of 65%), Antofagasta must prepare, fund, and deliver a Preliminary Economic Assessment on a project within the JV area by December 31, 2017 (Option 3).
- To earn a further 10% of the JV (for an aggregate total of 75%), Antofagasta must prepare, fund, and deliver a Feasibility Study on a project within the JV area by December 31, 2022 (Option 4).
- And to earn a further 5% of the JV (for an aggregate total of 80%), Antofagasta must fund 100% of all work programs during this phase and make a Development Decision within one year of the Option 4 exercise date (Option 5).
- Antofagasta will carry the Company through to production, and the Company will repay Antofagasta from proceeds, dividends, and sales generated by the actual production from any mine within the project area.

Callinan Generative:

On October 3, 2013, the Company and Callinan signed a three-year Generative Exploration Alliance Agreement (the "Agreement") which calls for Callinan to fund \$150,000 of generative exploration in Portugal during the first year of the Agreement and, at Callinan's option, to fund up to \$100,000 in each of the two subsequent years. In return for such funding, the Company will grant Callinan the option to receive a 0.5% NSR royalty on any new projects acquired as a result of the generative exploration work, or, if Callinan funds an additional \$150,000 in further exploration on any of the new projects, an option to receive a 1.5% NSR royalty on such projects. If the Company determines that further value can be generated for the new project after spending the additional \$150,000, Callinan has the option to contribute subsequent funding with the Company on a joint 50/50 basis, with Callinan's NSR and interest in the new project unchanged.

Callinan also has the option to fund additional exploration on the Company's existing mineral properties, if proposed by the Company, and would earn a 1.5% NSR royalty in return for funding \$150,000 in exploration on those projects (the "Alliance Property").

On May 7, 2014, Blackheath terminated the agreement with the Company on the Arga property and the Company dropped the property.

(d) Share Purchase Option Compensation Plan: (Continued)

The weighted average assumptions used to estimate the fair value of options for the six months ended June 30, 2014 and 2013 were:

	Six months ended June 30, 2014	Six months ended June 30, 2013
Risk-free interest rate	1.60%	Nil
Expected life	5 years	Nil
Expected volatility	138.42%	Nil
Expected dividend yield	Nil	Nil

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable measure of the fair value of the Company's share purchase options.

9. FINANCIAL INSTRUMENTS

The fair values of the Company's cash and cash equivalents, receivables, accounts payables and accrued liabilities, and due to related parties approximate their carrying values because of the short-term nature of these instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, interest risk and commodity price risk.

(a) Credit risk

The Company's cash and cash equivalents are held in financial institutions in Canada, Portugal, Kosovo and Barbados. The Company does not have any asset-backed commercial paper in its cash and cash equivalents

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure.

As at June 30, 2014, the Company had cash of \$331,182 (December 31, 2013 - \$439,154) to settle current liabilities, net of funds held for optionees, of \$735,896 (December 31, 2013 - \$407,667).

Accounts payable and accrued liabilities are due within the current operating period.

(c) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The risk that the Company will realize a loss as a result of a decline in the fair value of cash and cash equivalents is limited because they are generally held to maturity.

(d) Commodity price risk

The Company is exposed to price risk with respect to equity prices. Price risk as it relates to the Company is defined as the potential adverse impact on the Company's ability to finance due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

(e) Currency risk

The Company's property interests in Portugal and Kosovo make it subject to foreign currency fluctuations and inflationary pressures which may adversely affect the Company's financial position, results of operations and cash flows. The Company is affected by changes in exchange rates between the Canadian Dollar and foreign functional currencies. The Company does not invest in foreign currency contracts to mitigate the risks.

9. FINANCIAL INSTRUMENTS *(Continued)*

IFRS 7 establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets forth the Company's financial assets measured at fair value by level within the fair value hierarchy as at March 31, 2014 and December 31, 2013.

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, acquire or dispose of assets or adjust the amount of cash and cash equivalents held.

In order to maximize ongoing operating efforts, the Company does not pay out dividends. The Company's investment policy is to invest its short-term excess cash in highly liquid short-term interest-bearing investments with maturities of 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.
