1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

Avrupa Minerals Ltd. (the “Company”) was incorporated on January 23, 2008 under the Business Corporations Act of British Columbia and its registered office is Suite 2610 – 1066 West Hastings Street, Vancouver, BC, Canada, V6E 3X1. The Company changed its name on July 7, 2010 and began trading under the symbol “AVU” on the TSX Venture Exchange (the “Exchange”) on July 14, 2010. On September 20, 2012, the Company listed in Europe on the Frankfurt Stock Exchange under the trading symbol “8AM”. The Company is primarily engaged in the acquisition and exploration of mineral properties in Europe.

These consolidated financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. There are material uncertainties that cast significant doubt about the appropriateness of the going concern assumption.

If the Company is to advance or develop its mineral properties further, it will be necessary to obtain additional financing and while it has been successful in the past, there can be no assurance that it will be able to do so in the future. Failure to raise sufficient funds would result in the Company’s inability to make future required property payments, which would result in the loss of those property options.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

2. BASIS OF PREPARATION

a) Statement of compliance

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standards (“IAS”) 34 “Interim Financial Reporting” (“IAS34”) using accounting policies consistent with the IFRS issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

b) Basis of preparation

These condensed consolidated interim financial statements have been prepared on a historical cost basis except certain financial instruments which are measured at fair value. In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The preparation of these condensed consolidated interim financial statements in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements.

These condensed consolidated interim financial statements, including comparatives, have been prepared on the basis of IFRS standards that are published at the time of preparation.

2. BASIS OF PREPARATION *(Continued)*

c) New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the March 31, 2016 reporting period. The Company has not early adopted the following new and revised standard, amendment and interpretation that has been issued but is not yet effective:

- IFRS 9 (effective January 1, 2017) Financial Instruments
- IFRS 10 (effective January 1, 2017) Consolidated Financial Statements
- IAS 28 (effective January 1, 2017) Investments in Associates and Joint Ventures

The Company anticipates that the application of the above new and revised standard, amendment and interpretation will have no material impact on its results and financial position.

3. SIGNIFICANT ACCOUNTING POLICIES *(Continued)*

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IFRS as issued by the IASB on a basis consistent with those followed in the Company's most recent annual financial statement for the year ended December 31, 2015.

These unaudited condensed consolidated interim financial statements do not include all note disclosures required by IFRS for annual financial statements, and therefore should be read in conjunction with the annual financial statements for the year ended December 31, 2015. In the opinion of management, all adjustments considered necessary for fair presentation of the Company's financial position, results of operations and cash flows have been included. Operating results for the three month period ended March 31, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016.

(c) Share Purchase Option Compensation Plan: *(Continued)*

The weighted average assumptions used to estimate the fair value of options for the three months ended March 31, 2016 and 2015 were:

	Three months ended March 31, 2016	Three months ended March 31, 2015
Risk-free interest rate	Nil	Nil

Expected volatility	Nil	Nil
Expected dividend yield	Nil	Nil

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable measure of the fair value of the Company's share purchase options.

(d) Finder's Options:

The continuity of finder's options for the three months ended March 31, 2016 is as follows:

9. LOSS PER SHARE

Basic and diluted loss per share

The calculation of basic and diluted loss per share for the three months ended March 31, 2016 was based on the loss attributable to common shareholders of $57,281 (2015 – $247,733) and a weighted average number of common shares outstanding of 55,475,797 (2015 – 44,555,797).

10. FINANCIAL INSTRUMENTS

The fair values of the Company's cash, VAT receivables, due from optionees, due from related parties, other receivables, property deposits, accounts payables and accrued liabilities, and due to related parties approximate their carrying values because of the short-term nature of these instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, interest risk, commodity price risk and currency risk.

(a) Credit risk

The Company's cash is held in financial institutions in Canada, Portugal, Kosovo and Barbados. Amounts are receivable from optionees and certain governments for VAT.

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure.

As at March 31, 2016, the Company had cash of $158,834 (December 31, 2015 - $161,926), VAT receivables of $291,892 (December 31, 2015 - $343,898), due from optionees of $370,251 (December 31, 2015 - $200,349), other receivables of $15,604 (December 31, 2015 - $Nil) and due from related parties of $9,604 (December 31, 2015 - $Nil) to settle current liabilities of $931,351 (December 31, 2015 - $823,053).

Accounts payable and accrued liabilities are due within the current operating period.

(c) Interest rate risk

Interest rate risk is not material as the Company does not have any significant financial assets subject to fluctuation in interest rates.

(d) Equity market price risk

The Company is exposed to price risk with respect to equity market prices. Price risk as it relates to the Company is defined as the potential adverse impact on the Company's ability to finance due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

(e) Currency risk

The Company's property interests in Portugal and Kosovo make it subject to foreign currency fluctuations and inflationary pressures which may adversely affect the Company's financial position, results of operations and cash flows. The Company is affected by changes in exchange rates between the Canadian Dollar and foreign functional currencies. The Company does not invest in foreign currency contracts to mitigate the risks. The Company has net monetary liabilities of $211,107 dominated in Euros and US dollars. A 1% change in the absolute rate of exchange in Euros would affect its net loss by $1,942.

10. FINANCIAL INSTRUMENTS *(Continued)*

IFRS 7 establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets forth the Company's financial assets measured at fair value by level within the fair value hierarchy as at March 31, 2016 and December 31, 2015.
