1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

Avrupa Minerals Ltd. (the “Company”) was incorporated on January 23, 2008 under the Business Corporations Act of British Columbia and its registered office is Suite 2610 – 1066 West Hastings Street, Vancouver, BC, Canada, V6E 3X1. The Company changed its name on July 7, 2010 and began trading under the symbol “AVU” on the TSX Venture Exchange (the “Exchange”) on July 14, 2010. On September 20, 2012, the Company listed in Europe on the Frankfurt Stock Exchange under the trading symbol “8AM”. The Company is primarily engaged in the acquisition and exploration of mineral properties in Europe.

These consolidated financial statements have been prepared on the basis that the Company will continue as a going concern, which assumes that the Company will be able to meet its commitments, continue operations and realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. There are material uncertainties that cast significant doubt about the appropriateness of the going concern assumption.

If the Company is to advance or develop its mineral properties further, it will be necessary to obtain additional financing and while it has been successful in the past, there can be no assurance that it will be able to do so in the future. Failure to raise sufficient funds would result in the Company’s inability to make future required property payments, which would result in the loss of those property options.

These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

2. BASIS OF PREPARATION

a) Statement of compliance

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) using accounting policies consistent with IFRS issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

b) Basis of preparation

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for marketable securities classified as available-for-sale, which are stated at fair value through other comprehensive income (loss). In addition, these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The preparation of these condensed consolidated interim financial statements in conformity with IAS 34 requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates. These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements.

These condensed consolidated interim financial statements, including comparatives, have been prepared on the basis of IFRS standards that are published at the time of preparation.

3. SIGNIFICANT ACCOUNTING POLICIES

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IFRS as issued by the IASB on a basis consistent with those followed in the Company's most recent annual financial statements for the year ended December 31, 2016.

These unaudited condensed consolidated interim financial statements do not include all note disclosures required by IFRS for annual financial statements, and therefore should be read in conjunction with the annual financial statements for the year ended December 31, 2016. In the opinion of management, all adjustments considered necessary for fair presentation of the Company's financial position, results of operations and cash flows have been included. Operating results for the three month period ended March 31, 2017 are not necessarily indicative of the results that may be expected for the current fiscal year ending December 31, 2017.

New accounting standards and interpretations

Certain new accounting standards and interpretations have been published that are not mandatory for the March 31, 2017 reporting period. The Company has not early adopted the following new and revised standards, amendments and interpretations that have been issued but are not yet effective:

- IFRS 9 (Amended 2010) Financial Instruments (effective January 1, 2018)

The Company anticipates that the application of the above new and revised standards, amendments and interpretations will have no material impact on its results and financial position.

(Continued)

Portugal

The Company, through its 100% holding in MAEPA Empreendimentos Mineiros e Participacoes Lda (“MAEPA”), holds six exploration licenses in Portugal, spread from the north to the south in the country. The licenses have been issued to MAEPA by the government of Portugal, and relate to the following named properties:

- Alvalade
- Covas
- Alvito
- Marateca
- Santa Margarida do Sado
- Mertola

Licenses have varying required work commitments and carry a 3% Net Smelter Return (“NSR”) payable to the government of Portugal.

Alvalade:

Colt Resources Inc. (“Colt”) purchased Antofagasta Minerals S.A. (“Antofagasta”)’s 60% joint venture (“JV”) interest with Avrupa in the Alvalade property in August 2015 and was entitled to further earn-in of the property subject to certain payments to Antofagasta. Colt did not meet the payment requirements with Antofagasta and also failed to meet expenditure requirements under the JV arrangement with the Company.

As of December 31, 2016, the Company wrote down the amount owing from Colt to \$1 and as of March 31, 2017, the Company wrote off \$1. The Company is working on a route to consolidation of the program with Colt and Antofagasta.

Covas:

Blackheath Resources Inc. (“Blackheath”) has earned a 75% interest in the Covas property by spending a cumulative €1,320,000 and per the May 7, 2014 amended Joint Venture agreement, Blackheath can earn further interests, as noted below:

- To earn a further 5% of the JV (for an aggregate total of 80%), Blackheath must fund €498,000 on exploration by March 20, 2016. [Not completed and is currently being negotiated.]
- To earn a further 5% of the JV (for an aggregate total of 85%), Blackheath must fund €833,000 on exploration by March 20, 2017. [Subsequently not completed and is currently being negotiated.]

Since inception of the agreement and to March 31, 2017, Blackheath had forwarded a total of \$2,321,892 (€1,682,279) for the Covas property. The Company held \$4,446 (€3,126) on behalf of Blackheath to be spent on the Covas property, which is recorded as restricted cash.

Alvito:

Callinan Royalties Corporation (“Callinan”) (now Altius Minerals Corporation) has a 1.5% NSR royalty on the Alvito property.

Subsequently, on April 10, 2017, the Company signed an earn-in option agreement with Australia-based OZ Exploration Pty. Ltd. (“OZE”) (see Note 15).

Kosovo

The Company, through its 100% holding in Innomatik, holds two exploration licenses in Kosovo:

- Slivovo
- Metovit

The Slivovo license was issued during 2012 and the Metovit license was issued in 2015. Both licenses carry certain work commitments and a 5% NSR payable to the government of Kosovo.

Slivovo:

Byrnecut International Limited (“Byrnecut”) has earned an 85% interest in the Slivovo property after completing a Preliminary Feasibility Study (“PFS”) by April 10, 2017. Byrnecut and the Company had set up a joint venture entity known as Peshter Mining J.S.C. (“Peshter Mining”) to reflect the 85:15 ownership and transferred the license into Peshter Mining with Byrnecut now being the operator. If a party’s interest in Peshter Mining has been diluted to 10% or less, the diluted party’s interest in Peshter Mining will be converted into a 2% Net Smelter Return.

As of March 31, 2017, Byrnecut had forwarded a total of \$2,834,986 (€2,000,000) for the Slivovo property to the Company and spent over €1,880,000 as of March 31, 2017 in Peshter Mining.

Germany

The Company has earned an 85% interest in the Oelsnitz property under its agreement with Beak Consultants GmbH (“Beak”) by spending €140,000. There is no royalty attached to the property. The Company is working with Beak to set up a joint-venture entity. As of March 31, 2017, the Company had spent \$222,462 (€172,748) on the Oelsnitz property.

Price risk as it relates to the Company is defined as the potential adverse impact on the Company's ability to finance due to movements in individual equity prices or general movements in the level of the stock market. 11. FINANCIAL INSTRUMENTS (Continued)

(e) Currency risk

The Company's property interests in Portugal and Kosovo make it subject to foreign currency fluctuations and inflationary pressures which may adversely affect the Company's financial position, results of operations and cash flows. The Company is affected by changes in exchange rates between the Canadian Dollar and foreign functional currencies. The Company does not invest in foreign currency contracts to mitigate the risks. The Company has net monetary assets of \$47,500 dominated in US dollars and Euros. A 1% change in the absolute rate of exchange in US dollars and Euros would affect its net loss by \$2,900.

IFRS 7 establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, acquire or dispose of assets or adjust the amount of cash and cash equivalents held.
