Paul W. Kuhn	CEO & Director
Winnie Wong	CFO
Mark T. Brown	Lead Director
Paul Dirksen	Director
Ross Stringer	Director
Paul Nelles	Director
Frank Högel	Director
Adriano Barros	MAEPA Managing Director

## Share Structure

Shares Outstanding:	~86.9 million
Fully diluted:	~128.7 million
46% of shares held by insiders, family, and friends	
Cash on hand (6/30/17):	~C\$ 620,000
TSX Venture Exchange	AVU
US DTC Exchange	AVPMF
Frankfurt Stock Exchange	8AM
52-Week Range	\$0.08—0.18

**Prospect Generator focused on aggressive exploration in politically stable and prospective regions of Europe**

## Investment Highlights

- Eight licenses in three European countries: Portugal, Kosovo and Germany.
- 2 JV's in Portugal; 1 JV in Kosovo
- Projects located in historic mining districts with existing or formerly-producing mines, often since pre-Roman times.
- All areas have strong geological potential for discovery of further economic metal deposits.
- Shareholder value created through development of project portfolio to joint venture or sell to larger mining-oriented companies.
- For every C\$ raised, we can spend more than C\$1.50 on exploration due to JV partner funding
- Strong, dedicated management team with discovery track record and extensive experience from exploration to development

## RECENT DEVELOPMENTS

### PORTUGAL

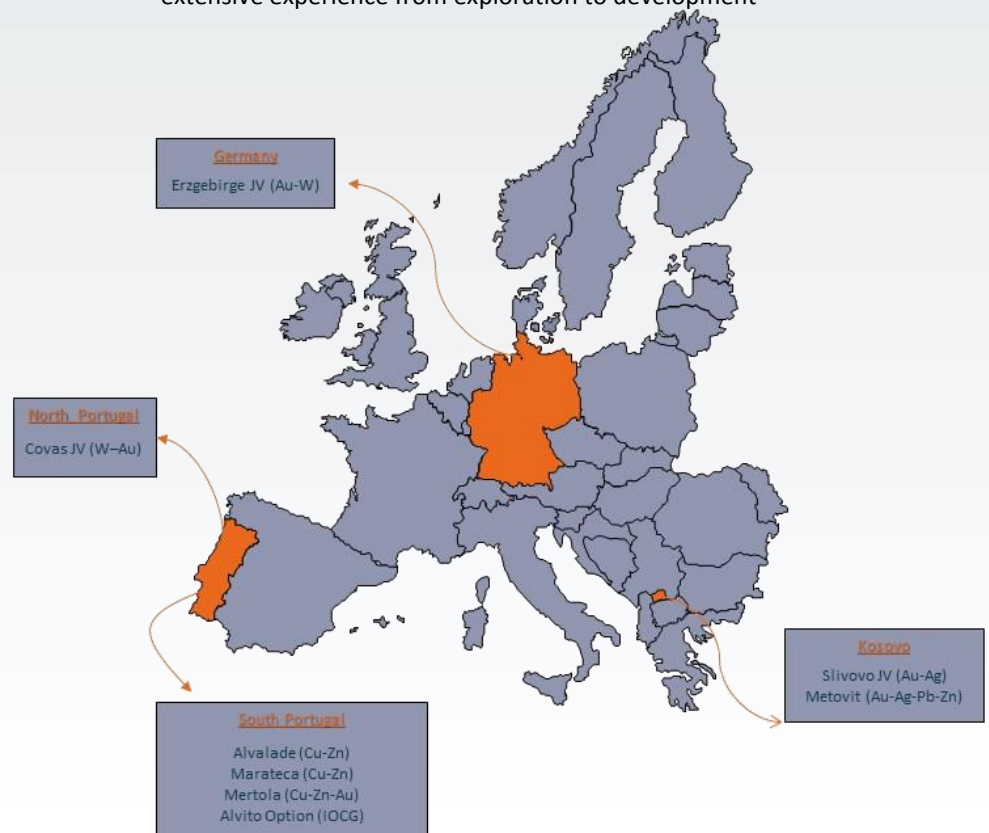

- Avrupa consolidates 100% ownership at Alvalade.
- Avrupa identifies brownfields/development opportunity in the Caveira-Lousal-Sesmaria District.
- Starts targeting work at Alvito, funded by new partner OZ Minerals
- Plans for drilling at Alvito and Covas underway

### KOSOVO

- Completion of 17-hole drill program at Slivovo by JV partner, Byrncut International.
- Work at Metovit Project continues

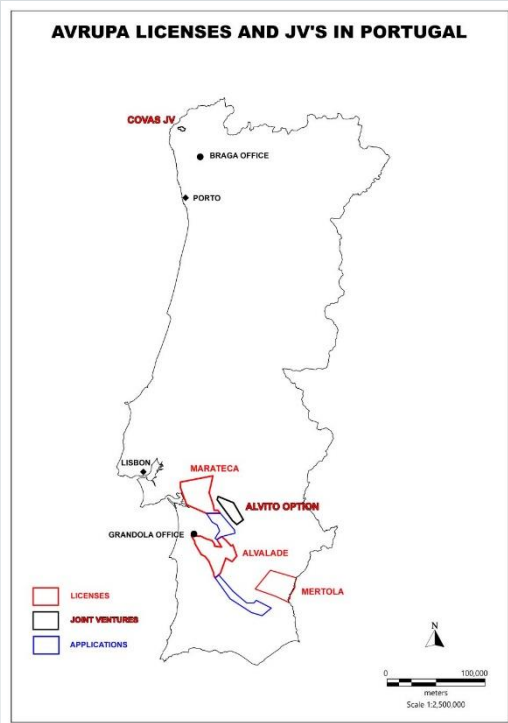

### CORPORATE

- \$1.017 million financing completed – July 2017

## PORTUGAL

5 licenses – 2,911 km<sup>2</sup> – 2 JV's

### Avrupa operates two joint ventures in Portugal:

- The **Alvito Option Agreement** with OZ Minerals. The 300 km<sup>2</sup> license is located in the *Ossa Morena Zone* of south Portugal, immediately adjacent to the *Pyrite Belt* terrane. Exploration work is underway at the **Alcaçovas IOCG target** with drilling planned for Q4 2017.
- The **Covas JV**, with Blackheath Resources, covering one license in northern Portugal for intrusion-related W deposits. Drilling planned for Q4 2017.

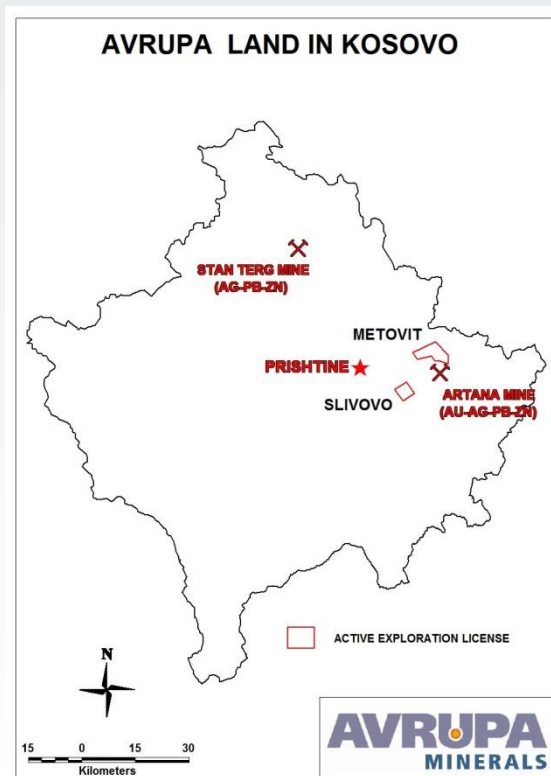

### Avrupa holds three drill-ready licenses in Portugal:

- The Company regained 100% ownership of the **Alvalade Cu-Zn Project**. Ongoing studies of the *Caveira-Lousal-Sesmaria* Trend suggest a unique brownfields/development opportunity in this historic district. Includes two past-producing mines and the recent **discovery of VMS-style mineralization at Sesmaria and Monte da Bela Vista**.
- At the **Mertola Cu-Zn Project**, The Company holds the exploration rights to potential VMS-style mineralization at the historic **São Domingos Mine** and at the **Chança Prospect**. Brownfields exploration underway.
- There are at least ten VMS targets in the **Marateca Cu-Zn Project**. Scout drilling at the **Pego do Altar Gossan** shows that surface mineralization continues downward. Greenfields exploration continuing.

## KOSOVO

2 licenses – 47 km<sup>2</sup> – 1 JV

- Licenses located in the historically prolific (Ag-Pb-Zn) Vardar Zone.
- Drilling at the **Slivovo Gold Project** completed for 2017. Geo-structural model at Slivovo being updated with new targets contemplated. Partner spending allowing Avrupa to dilute to 2% NSR.
- **Metovit**, formerly the Kamenica license, covers a porphyry mineral target, and is located in geological terrane similar to that of Slivovo. First-pass geochemical sampling completed. Sample results suggest base metal and gold target areas. Follow-up work planned for Q4.
- Developing a new generative program for Kosovo; strategic partnership available.

## GERMANY

1 license – 307 km<sup>2</sup>

- Gold, tin, and cobalt to be the focus of exploration in the **Erzgebirge Mining District** in the eastern German province of Saxony.
- Potential for a new gold district with the target being large, bulk-tonnage deposits related to granitic intrusions similar to Fort Knox, Dublin Gulch, and others in the Tintina Gold Belt.
- Avrupa and partner Beak Consultants are the only group in the area exploring for gold. Others exploring for tin and base metals.
- Funded more than € 140,000 of exploration work to earn-in to 85% of the Oelsnitz Project to form the Erzgebirge JV
