Prospect Generator focused on aggressive exploration in politically stable and prospective regions of Europe

Investment Highlights

- Nine licenses in three European countries: Portugal, Kosovo and Germany.
- 2 JV's in Portugal; 1 JV in Kosovo
- Projects located in historic mining districts with existing or formerly-producing mines, often since pre-Roman times.
- All areas have strong geological potential for discovery of further economic metal deposits.
- Shareholder value created through development of project portfolio to joint venture or sell to larger mining-oriented companies.
- For every C\$ raised, we can spend more than C\$1.50 on exploration due to JV partner funding
- Strong, dedicated management team with discovery track record and extensive experience from exploration to development

RECENT DEVELOPMENTS

PORTUGAL

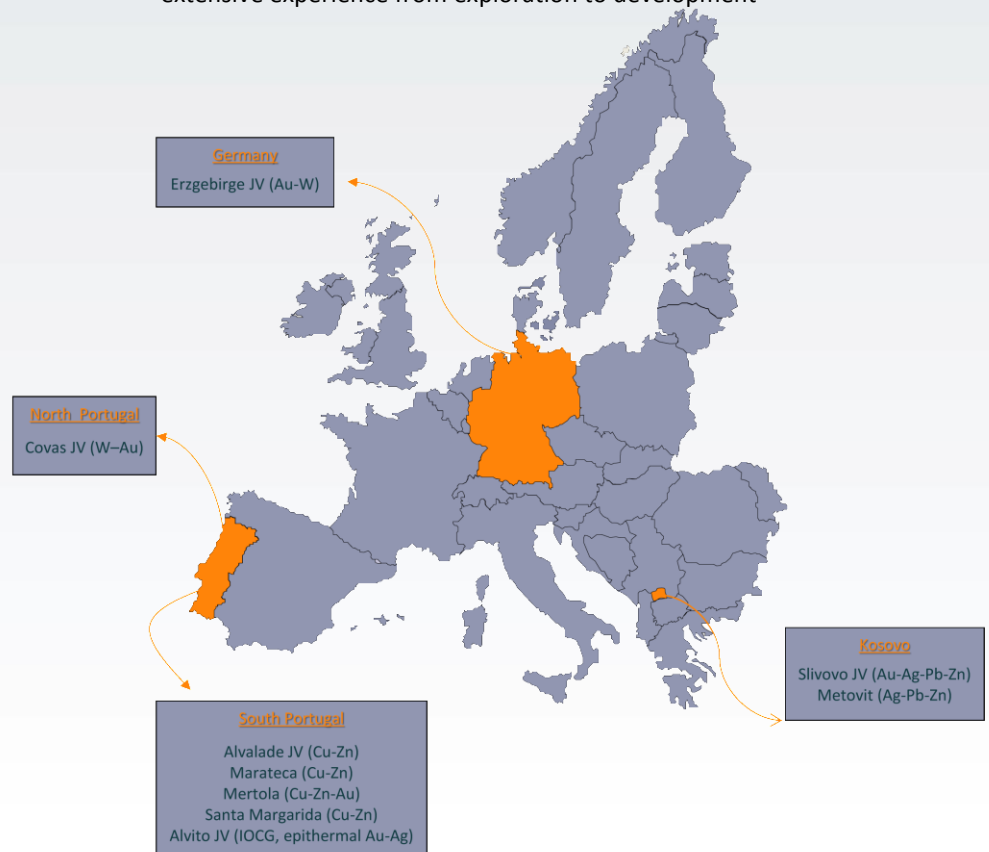

- Avrupa reviewing options to consolidate Alvalade project
- Scout drilling at Marateca shows downdip continuation of surface mineralization at the Pego do Altar gossan; logging and sampling underway

KOSOVO

- Slivovo Gold Project Study completed; partner has earned into 85% of Peshter Mining JSC
- Work at Metovit Project started

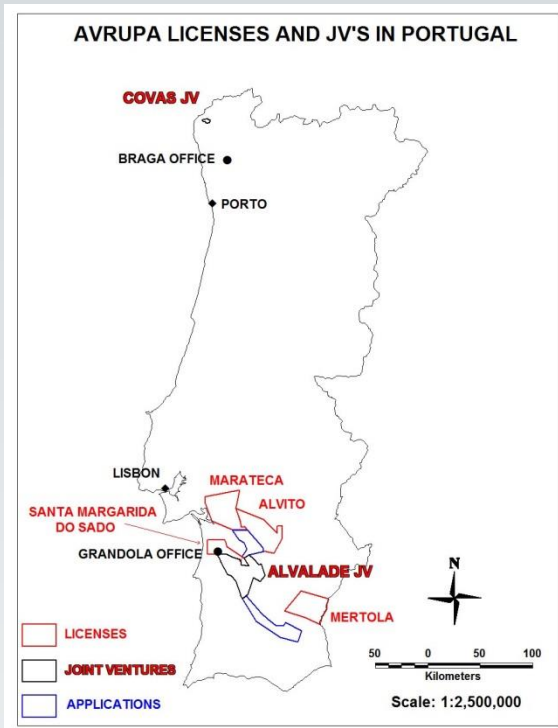

CORPORATE

- \$1.3 million financing completed – July 2016
- \$ 661,500 raised via exercise of warrants – September 2016

PORTUGAL

6 licenses – 3,821 km² – 2JV's

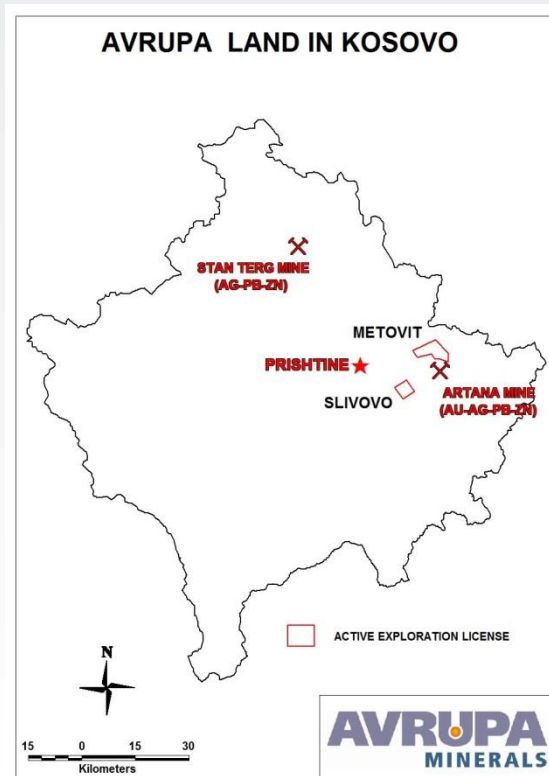

Avrupa operates two joint ventures in Portugal:

- The **Alvalade JV**, with Colt Resources Inc., covering some 900 km² in the *Iberian Pyrite Belt* of southern Portugal, for Cu-rich massive sulfide deposits – **includes discovery of Sesmarias VMS mineralization.**
- The **Covas JV**, with Blackheath Resources, covering one license in northern Portugal for intrusion-related W deposits.
- The Company holds the Alvito Cu-Au license, covering approximately 853 km² in the Ossa Morena Zone of south Portugal, immediately adjoining the Pyrite Belt terrane. First priority work completed at the **Alcaçovas IOCG target.** Drill target ready. JV discussions underway.
- The Company holds the **Marateca** Cu-Zn project in the Iberian Pyrite Belt, where the **Pego do Altar gossan** is currently the first priority target; other targets under review on 923 km² license.
- Other licenses in the Pyrite Belt available for joint venture include the **Mertola** Cu-Zn property. Developing drill targets at Chança Prospect. Two new applications in the Pyrite Belt.

KOSOVO

2 licenses – 47 km² – 1JV

- Licenses located in the historically prolific (Ag-Pb-Zn) Vardar Zone.
- **Slivovo Gold Project Study** has been received by AVU, and partner has earned into 85%. Company now has choice to continue funding as minority partner or dilute to a 2% NSR. Aggressive drill project planned for 2017.
- **Metovit**, formerly the Kamenica license, covers a porphyry mineral target, and is located in geological terrane similar to that of Slivovo. First-pass geochemical sampling initiated. Sample results pending.
- Developing a new generative program for Kosovo; strategic partnership available.

GERMANY

1 license – 307 km²

- Gold, tin and tungsten to be the focus of exploration in the **Erzgebirge Mining District** in the eastern German province of Saxony.
- Potential for a new gold district with the target being large, bulk-tonnage deposits related to granitic intrusions similar to Fort Knox, Dublin Gulch, and others in the Tintina Gold Belt.
- Avrupa and partner Beak Consultants are the only group in the area exploring for gold.
- Funded more than € 140,000 of exploration work to earn-in to 85% of the Oelsnitz Project to form the Erzgebirge JV
